

Mirosław Magola alias Mind Force asks whether quantum consciousness could all be an illusion.

The fundamental nature of reality is actually quantum consciousness. In his documentary Magola explores the reasons why quantum consciousness may be the fundamental essence of the Universe.

Magola believes that the sciences are being constricted by dogmatism, and in particular by a subservience to the philosophy of materialism, the doctrine that matter is the only reality and that the mind is nothing but the physical activity of the brain.

Mirosław Magola has provided a variety of media presentations that cause us to question the limitations of our knowledge, giving us impetus to find an explanation. "Anytime we gain new knowledge, our perceptions expand."

Consciousness is the state or quality of awareness, or, of being aware of an external object or something within oneself. It has been defined as: sentience, awareness, subjectivity, the ability to experience or to feel, wakefulness, having a sense of selfhood, and the executive control system of the mind. Despite the difficulty in definition, many philosophers believe that there is a broadly shared underlying intuition about what consciousness is. As Max Velmans and Susan Schneider wrote in *The Blackwell Companion to Consciousness*: "Anything that we are aware of at a given moment forms part of our consciousness, making conscious experience at once the most familiar and most mysterious aspect of our lives."

The quantum mind or quantum consciousness hypothesis proposes that classical mechanics cannot explain consciousness. It posits that quantum mechanical phenomena, such as quantum entanglement and superposition, may play an important part in the brain's function and could form the basis of an explanation of consciousness. It is not a single theory, but a collection of hypotheses.

In neuroscience, quantum brain dynamics - QBD - is a hypothesis to explain the function of the brain within the framework of quantum field theory.

Large systems, such as those studied biologically, have less symmetry than the idealized systems or single crystals often studied in physics. Jeffrey Goldstone proved that where symmetry is broken, additional bosons, the Nambu–Goldstone bosons, will then be observed in the spectrum of possible states; one canonical example being the phonon in a crystal.

Michio Kaku explains how the quantifying approach common in physics can be used to model consciousness.

Albert Einstein — 'A human being is a part of the whole called by us universe, a part ... separated from the rest, a kind of optical delusion of his consciousness.

Richard Feynman "Nobody understands quantum mechanics."

Scientists proclaim animal and human consciousness the same.

A remarkable thing happened at The First Annual Francis Crick Memorial Conference held at the University of Cambridge, July 7 in U.K. A group of prominent neuroscientists signed a proclamation declaring human and animal consciousness alike

Stephen Hawking — considered the greatest mind in physics since Albert Einstein — was the guest of honor at the signing ceremony. The declaration was authored by Philip Low and edited by Jaak Panksepp, Diana Reiss, David Edelman, Bruno Van Swinderen, Philip Low and Christof Koch, all well-respected neuroscientists.

Here is how Hollywood has portrayed the subject of consciousness , quantum mind , quantum consciousness , telekinesis , mind power and brain power in entertainment movies with storylines set in more or less the real world and not movies that .

Hollywood Telekinesis and Psychokinesis Movie List:

Will Power, Pearl White, Chester Barnett, Joseph Belmont (silent film; see general list below for plot).

Project X, Christopher George, Monte Markham. Carrie, Sissy Spacek, John Travolta, Amy Irving, et al.

The Spell, Susan Myers, Helen Hunt, Lee Grant.

The Initiation of Sarah, Kay Lenz, Robert Hays.

The Fury, Kirk Douglas, Andrew Stevens, Amy Irving.

Jennifer, Lisa Pelikan, Nina Foch, Jeff Corey.

The Medusa Touch, Richard Burton, Lee Remick.

Patrick, Robert Thompson.

Harlequin, Robert Powell, David Hemming, Broderick Crawford.

Patrick Still Lives, Gianni Dei. (Italian sequel)

Scanners, Michael Ironside.

Kiss Daddy Goodbye, Nell Regan, Patrick Regan III.

The Sender, Zeljko Ivanek, Kathryn Harold.

Firestarter, Drew Barrymore, Martin Sheen, George C. Scott.

Scanners II: The New Order, David Hewlett.

Scanners III: The Takeover, Lilian Komorowska.

The Lawnmower Man, Jeff Fahey, Pierce Brosnan.

Scanner Cop, Daniel Quinn, Richard Lynch.

Scanners: The Showdown aka Scanner Cop II, Daniel Quinn.

Phenomenon, John Travolta, Kyra Sedgwick, Robert Duvall, et al.

The Rage: Carrie 2, Emily Bergl, Amy Irving.

Project Human Weapon aka Mindstorm, Judge Reinhold, William Zabka.

X-Men, Ian McKellen, Famke Janssen, et al.

Firestarter 2: Rekindled, Marguerite Moreau, Malcolm McDowell, Dennis Hopper (TV movie sequel).

Carrie, Angela Bettis, Emilie de Ravin (TV movie remake).

Momentum, Louis Gossett Jr, Teri Hatcher, Grayson McCouch.

Phenomenon II, Christopher Shyer, Jill Clayburgh (made-for-TV movie).

X 2: X-Men United, Ian McKellen, Famke Janssen, et al.

Sidekick, David Ingram, Perry Mucci.

The Matrix and The Matrix Revolutions is a American science fiction action film written and directed by The Wachowskis, starring Keanu Reeves, Laurence Fishburne, Carrie-Anne

The One's powers can extend within and beyond that of the Matrix, granting him the abilities like Telekinesis. The One is able to use this power to control his surroundings using his mind. A prime example of this is when Neo causes multiple Sentinels and Tow Bombs to self-destruct when approaching him. Within the Matrix, Neo also used telekinesis to draw upon a pair of sais from the Chateau walls and stop bullets. He is also able to fly at supersonic speeds and jump long distances using telekinesis, by focusing the power on himself.

In 2010 and 2011 Miroslaw Magola appeared in Stan Lee's Superhumans, where he performed his telekinetic demonstration Stan Lee's Superhumans documentary was aired on Discovery Channel and History Channel. Daniel Browning Smith as he scours the globe for comic legend Stan Lee, looking for real life people with unique genetic traits. Next, it's off to Brighton, England, where Miroslaw Magola claims to harnesses the power of telekinesis , and can lift objects off the floor, transport them through the air and force them to stick to his body—all using the power of his mind.
